

**Spec McElroy Metal Panels
with Kynar 500[®] Coating and
20 years from now
you'll thank us.
Okay, make that 5 years!**

**Installation Date: June, 1994
Photo Date: April, 2000**

HERE'S PROOF: Two panels of our McElroy Max-Rib with Fluoropon Tudor Brown coating, made with Kynar 500[®] resin, were included in a shipment of our Tudor Brown Max-Rib with Siliconized Polyester coating. Both types of panels were erected at this Belpre, Ohio jobsite in June of 1994. Immediately after installation, there was no difference in appearance.

LOOK AT THE DIFFERENCE after 5 years of exposure to Ohio weather: Severe fading and chalking of the Siliconized Polyester coating. **NO FADING, NO CHALKING** of the "looks-like-new" Kynar 500[®] coating.

McElroy panels keep their fresh, bright, "new building" look far longer than ordinary panels, thanks to high-performance Kynar 500[®] coatings. Years later, your McElroy metal roof will look sharp, still resist fading, chalking and environmental impurities.

Kynar 500[®] coatings...Specify McElroy panels and be sure.

Years from now you'll thank us.
